Organization

Title:     FGM 215 Active Learning Classroom Enhancement     Date:     January 2	023					
Name (Contact Person): Angel Littlejohn						
Address: P.O. Box 43545 Lafayette, LA 70504-3545						
Phone Number: 482-5783 Email: angel.littlejohn@louisiana.edu						
	B.I. Moody III College of Business Administration (MCOBA) Information Systems & Multimedia Laboratories (ISM)					

# ABSTRACT (250 words or less):

This grant proposal is requesting support to equip FG Mouton room 215 with the technology and fixtures necessary to create an active learning classroom that promotes a collaborative and engaging environment for both instructors and students. FGM 215 has an over seven-year-old antiquated projector, seven year-old computer, no document camera, and forty (40) antiquated desks which hinder instructional quality, student collaboration, use of the room for courses needing technology, and use of the room for special programming (i.e. sales competition).

The Moody College of Business Administration's Office of Information Systems & Multimedia Laboratories (ISM) is requesting to upgrade this room with technological improvements including one (1) new computer, one (1) ceiling-mounted projector, one (1) document camera, one (1) SMART podium, forty two (42) adaptable and mobile tablet-arm chairs. These enhancements support the University's values of collaboration, intellectual curiosity, and creativity and would have a substantial impact on the experience for all faculty and students utilizing this classroom across multiple colleges and disciplines.

The funding support of this request will serve students, faculty, and staff from all disciplines by equipping the classroom with the technology needed to meet their expectations.

# Purpose of Grant and Impact to Student Body as a Whole

The need for an active learning classroom with updated technology is a necessity for our faculty to incorporate teaching strategies beyond traditional lecture. Our goal is to create a flexible classroom environment that supports students in the many ways they learn. The active learning concept promotes the opportunity for small group collaboration on problem-solving, team-based projects and discussions. An active learning classroom environment promotes student-centered learning and instructor engagement. Implementation of a flexible learning space that combines classroom design, technology, and furniture can improve the quality of teaching and learning (Persk, Orr and Alomari, 2016).

Most students today have grown up using technology. The adoption of digital technology has transformed teaching and all classroom engagement. This classroom is currently not being used to its full capacity because it lacks the necessary up-to-date modern equipment for faculty to teach. Technology and flexible workspaces in the classroom make it feasible for students to collaborate with one another and with their instructors. It also helps the instructor improve their teaching process when access to flexible, friendly learning spaces are available.

A study published in the peer-reviewed journal Planning for Higher Education noted "students and faculty

were asked to compare their experience in traditionally-furnished classrooms with an environment designed to provide more flexibility in learning. The results showed that classrooms designed for active learning—i.e., where physical space supports a focus on engaging experiences for students and faculty had a statistically significantly effect on student engagement." (Bergsagel, 2015). Hartikainen, Rintala, Pylväs, and Nokelainen study that student's self-construction of knowledge is a vital part of active learning.

In 2016, ISM conducted a survey of technology needs in the classroom - the results were overwhelming and clear, showing just how necessary a computer, overhead projector, and document camera are to the instructors. Empirical evidence shows a marked improvement in student engagement and success when the necessary technology is present. According to this survey, 88% of faculty members utilize document cameras for effective teaching, especially when they demonstrate complex problems for the students to practice. The data is concise - when instructors are able to teach utilizing technology, they are most effective and students are more engaged and actively participating in the class.

Yale University's Poorvue Center for Teaching and Learning website <u>https://poorvucenter.yale.edu/Class-roomSeatingArrangements</u> emphasizes best practices. One report states "the physical setup of chairs, tables, and technology in a classroom can significantly influence learning. Instructional communication theory suggests that seating arrangements can impact how the instructor communicates with students and how the students interact with one another, impacting engagement, motivation, and focus" (McCorskey and McVetta, 1978). More recent research also suggests that students tend to prefer more flexible seating arrangements (Harvey and Kenyon, 2013). More flexible seating arrangements will allow more interactive work with others, which connects with active learning through collaboration, interaction, and dialogue (Hartikainen, Rintala, Pylväs, and Nokelainen, 2019).

The requested technology would allow instructors to teach using graphs, PowerPoint slides, videos, and simulations. Some disciplines, such as accounting, also have a need for a document camera. These instructors need equipment that allows them to walk their students through the case scenarios that they are discussing when teaching problem solving. This technology is also paramount for students with a visual learning style. This classroom lacks vital technology components for effective instruction thereby placing constraints on classroom usability.

FGM Mouton 215 accommodates up to 42 students. Instructors from several different disciplines have taught in FGM classrooms, so this upgrade would create a supportive collaborative learning environment for a wide array of students, not just limited to MCOBA students. Other classes taught in the past in FGM include math, counseling, communications, educational foundations and leadership, political science, psychology, and physics.

Improved technology also promotes better testing and allows for better assessment. Such testing may be using easier standardized testing methods or through immediate in-class answer systems (response clickers). Using these formats, teachers can quickly see which students require more assistance, and instruction can be tailored to the individual needs of the students.

# **Existing Issues**

FGM 215 currently includes an outdated computer, antiquated projector, desktop audio speakers, and forty (40) antiquated desks.

- Computer: The computer in FGM 215 is very old (installed at least 7 years ago) and has dissuaded faculty members from installing more modern and current versions of needed instructional software. Not being able to teach using current software simultaneously hinders the teachers and negatively affects the learning of students. There have been multiple complaints received about the slow PC in this classroom.
- Projector: FGM 215 contains an older projector (estimated age is 15 years old) causing multiple maintenance issues. For example, the light bulb dying out at a highly accelerated rate which takes additional personnel time to fix and increases bulb replacement costs. Additionally, the image projected is of poor quality making it difficult for students to read what is on the screen. The culmination of these preventable issues take away from class time and causes quite the disruption if the teacher is unable to use the projector.
- Audio/Speakers: Existing speakers are outdated speakers that are not very compatible to the SMART package. They provide limited volume and low quality.
- Student Desks: The existing desks do not support a flexible, active learning classroom environment or promote inclusion of students with learning and/or physical disabilities. This situation affects their ability to effectively use any electronic resources the instructor may provide. The current arrangement does not offer any flexibility in the room configuration which impacts learning and engagement.

## **Funding Objectives**

- Upgrade technology to support current teaching methods and inclusion of students who are using their personal laptop computers or mobile devices.
- Broaden instructor's ability to adjust the room environment to suit the flow of learning throughout a class period (i.e. students can work in groups/pods).
- Allow instructors and students a high degree of control over their interactions.
- Improve instructional quality and enrich student-learning experiences.
- Increase the opportunity for students to engage and collaborate with each other.
- Foster communication and collaboration skills.
- Provide accessibility to students with learning and/or physical disabilities.

## Proposed Active Learning Classroom Enhancements

• Implement modern adaptable and mobile tablet seating that supports laptop computer/mobile devices, left/right hand users, varying body types, students with learning and/or physical disabilities, and adaptable positioning to create different classroom setup opportunities.

- Replace the existing technology with an updated projector, audio, and computer.
- Add a SMART podium and document camera to the classroom technology suite.

While the requested technological equipment is the standard setup for a SMART classroom, the enhancement of FGM 215 into an active learning classroom will provide instructors the resources needed to promote student engagement and collaboration. If this grant request receives funding, it will enhance the College of Business and the University by improving student- centered learning experience. The funding of this grant would also put us one-step closer to fulfilling the University's vision of making every classroom on campus a SMART classroom.

FGM 215 is mainly utilized for business classes; however, it is not limited to only business classes. It can also utilized for classes in different colleges. The schedule of classes for Spring 2023 is shown below:

Time	Monday	Wednesday	Friday	Time	Tuesday	Thursday	Classroom Type
8:00 8:50				8:00 9:15			STEP Smart
9:00 9:50				9:30 10:45			FGM 215
10:00 10:50				11:00 12:15	D	105-001 as /22 ad	Classroom Capacity
11:00 11:50				12:30 1:45	TE	345-004 3D /22 ad	42
12:00 12:50				2:00 3:15			
1:00 2:15	Boy	331-001 wles 22 - ss		3:30 4:45			
2:30 3:45				5:00 Till			STEP SMART
4:00 5:15				6:00 Till			
6:00 Till				0.00 mil			

FGM 215 can be utilized for purposes not related to classes. For example, as shown below, FGM 215 is being utilized for a Literary Rally on Saturday, February 4, 2023, from 6:00 am - 3:00 pm. Other events requests are expected as the semester progresses.

Special Room Reservations						
Date	Date     Day of the WK     Start Time     End     Purpose     Contact Info					
2/4	Saturday	6:00 AM	3:00 PM	Literary Rally	David - 1/11/23 - mh	

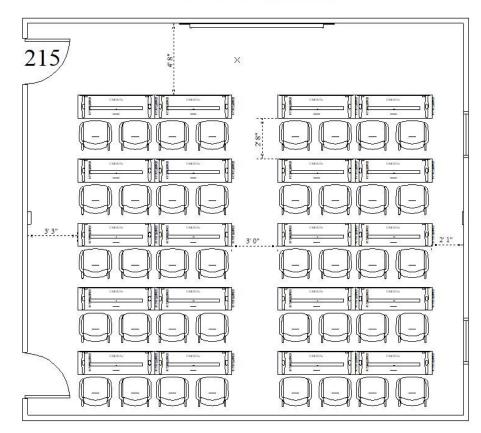

*Existing FGM 215:* Antiquated seven-year-old computer, fifteen-year-old projector, and forty (40) antiquated desks.

**Proposed FGM 215 Active Learning Classroom:** New multimedia podium, computer, document camera, projector, and forty (40) Stacking Multi-Purpose Chairs and twenty (20) 18 x 60 tables on casters.

# 18 X 60 TABLES

### **Projected Lifetime of Enhancement**

- Technology: Expected to have a five-year life span.
- Furniture: 15 year limited warranty.

### **Responsibilities**

The person responsible for implementation and oversight of this project is Angel Littlejohn, MCOBA ISM Manager. Responsibilities include:

- a. Implementation
  - MCOBA ISM
- b. Installation
  - Technology: A state contractor for SMART technology installation, assisted by MCOBA ISM will install the projector, podium and its components. MCOBA ISM will install the PC.
  - Furniture: General Office Supply
- c. Maintenance
  - MCOBA ISM: Provide ongoing maintenance and will immediately troubleshoot any problems that may occur.
- d. Operation
  - MCOBA ISM
- e. Training (with qualifications)
  - MCOBA ISM will train faculty and staff assigned to use the room.

MCOBA ISM currently maintains over 100 faculty and staff PCs, 8 classrooms in Moody Hall and 15 classrooms in FG Mouton that are enhanced with technology so the department is very familiar with the functionality of the equipment requested. MCOBA ISM has adequate staff capacity to handle the upkeep and maintenance of the equipment requested in this grant proposal.

- **Equipment \$40,955.23**  Technology \$17,675.43 1.

  - Furniture \$23,279.80
- 2. Software **\$0**
- 3. Supplies **\$0**
- 4. Maintenance **\$0**
- 5. Personnel **\$0**
- Other 6. \$5250.00

TOTAL:

\$46,205.23
