FGM 214 Active Learning Classroom Enhancement Title

B.I. Moody III College of Business Administration
Angel Littlejohn, ISM Manager

Name of Submitter
(Faculty or Staff Only)

B.I. Moody III College of Business Administration (MCOBA)
Information Systems & Multimedia Laboratories (ISM)

Organization

Title: **FGM 214 Active Learning Classroom Enhancement**

Date: January 2024

Name (Contact Person): Angel Littlejohn

Address: P.O. Box 43545 Lafayette, LA 70504-3545

Phone Number: 482-5783

Email: angel.littlejohn@louisiana.edu

Department/College/Org: B.I. Moody III College of Business Administration (MCOBA)

~~Information Systems & Multimedia Laboratories (ISM)~~

ABSTRACT (250 words or less):

This grant proposal is requesting support to equip FG Mouton room 214 with the technology and fixtures necessary to create an active learning classroom that promotes a collaborative and engaging environment for both instructors and students. FGM 214 has an over eight-year-old antiquated projector, eight-year-old computer, no document camera, and forty (40) antiquated desks which hinder instructional quality, student collaboration, use of the room for courses needing technology, and use of the room for special programming (i.e. sales competition).

The Moody College of Business Administration's Office of Information Systems & Multimedia Laboratories (ISM) is requesting to upgrade this room with technological improvements including one (1) new computer, one (1) ceiling-mounted projector, one (1) document camera, one (1) SMART podium, forty (40) Stacking Multi-Purpose Chairs and twenty (20) 18 x 60 tables on casters. These enhancements support the University's values of collaboration, intellectual curiosity, and creativity and would have a substantial impact on the experience for all faculty and students utilizing this classroom across multiple colleges and disciplines.

The funding support of this request will serve students, faculty, and staff from all disciplines by equipping the classroom with the technology needed to meet their expectations.

Purpose of Grant and Impact to Student Body as a Whole

The need for an active learning classroom with updated technology is a necessity for our faculty to incorporate teaching strategies beyond traditional lecture. Our goal is to create a flexible classroom environment that supports students in the many ways they learn. The active learning concept promotes the opportunity for small group collaboration on problem-solving, team-based projects and discussions. An active learning classroom environment promotes student-centered learning and instructor engagement. Implementation of a flexible learning space that combines classroom design, technology, and furniture can improve the quality of teaching and learning (Persk, Orr and Alomari, 2016).

Most students today have grown up using technology. The adoption of digital technology has transformed teaching and all classroom engagement. This classroom is currently not being used to its full capacity because it lacks the necessary up-to-date modern equipment for faculty to teach. Technology and flexible workspaces in the classroom make it feasible for students to collaborate with one another and with their instructors. It also helps the instructor improve their teaching process when access to flexible, friendly learning spaces are available.

A study published in the peer-reviewed journal *Planning for Higher Education* noted “students and faculty were asked to compare their experience in traditionally-furnished classrooms with an environment designed to provide more flexibility in learning. The results showed that classrooms designed for active learning— i.e., where physical space supports a focus on engaging experiences for students and faculty— had a statistically significant effect on student engagement.” (Bergsagel, 2015). Therefore, more flexibility in a learning environment further supports Hartikainen, Rintala, Pylväs, and Nokelainen study that student’s self-construction of knowledge is a vital part of active learning.

In 2016, ISM conducted a survey of technology needs in the classroom - the results were overwhelming and clear, showing just how necessary a computer, overhead projector, and document camera are to the instructors. Empirical evidence shows a marked improvement in student engagement and success when the necessary technology is present. According to this survey, 88% of faculty members utilize document cameras for effective teaching, especially when they demonstrate complex problems for the students to practice. The data is concise - when instructors are able to teach utilizing technology, they are most effective and students are more engaged and actively participating in the class.

Yale University’s Poorvue Center for Teaching and Learning website <https://poorvuecenter.yale.edu/ClassroomSeatingArrangements> emphasizes best practices. One report states “the physical setup of chairs, tables, and technology in a classroom can significantly influence learning. Instructional communication theory suggests that seating arrangements can impact how the instructor communicates with students and how the students interact with one another, impacting engagement, motivation, and focus” (McCorskey and McVetta, 1978). More recent research also suggests that students tend to prefer more flexible seating arrangements (Harvey and Kenyon, 2013). More flexible seating arrangements will allow more interactive work with others, which connects with active learning through collaboration, interaction, and dialogue (Hartikainen, Rintala, Pylväs, and Nokelainen, 2019).

The requested technology would allow instructors to teach using graphs, PowerPoint slides, videos, and simulations. Some disciplines, such as accounting, also have a need for a document camera. These instructors need equipment that allows them to walk their students through the case scenarios that they are discussing when teaching problem solving. This technology is also paramount for students with a visual learning style. This classroom lacks vital technology components for effective instruction thereby placing constraints on classroom usability.

FGM Mouton 214 accommodates up to 38 students. Instructors from several different disciplines teach in FGM classrooms, so this upgrade would create a supportive collaborative learning environment for a wide array of students, not just limited to MCOBA students. Other classes taught in FGM include math, counseling, communications, educational foundations and leadership, political science, psychology, and physics.

Improved technology also promotes better testing and allows for better assessment. Such testing may be using easier standardized testing methods or through immediate in-class answer systems (response clickers). Using these formats, teachers can quickly see which students require more assistance, and instruction can be tailored to the individual needs of the students.

Existing Issues

FGM 214 currently includes an outdated computer, antiquated projector, antiquated audio speakers, and forty (40) antiquated desks.

- **Computer:** The computer in FGM 214 is very old (installed at least eight years ago) and has dissuaded faculty members from installing more modern and current versions of needed instructional software. Not being able to teach using current software simultaneously hinders the teachers and negatively affects the learning of students. There have been multiple complaints received about the slow PC in this classroom.
- **Projector:** FGM 214 contains an older projector (estimated age is eight years old) causing multiple maintenance issues. For example, the light bulb dying out at a highly accelerated rate which takes additional personnel time to fix and increases bulb replacement costs. Additionally, the image projected is of poor quality making it difficult for students to read what is on the screen. The culmination of these preventable issues takes away from class time and causes quite the disruption if the teacher is unable to use the projector.
- **Audio/Speakers:** Existing speakers are outdated speakers. They provide limited volume and low quality.
- **Student Desks:** The existing desks do not support a flexible, active learning classroom environment or promote inclusion of students with learning and/or physical disabilities. This situation affects their ability to effectively use any electronic resources that the students may bring in or the instructor may provide. The current arrangement does not offer any flexibility in the room configuration which impacts learning and engagement.

Funding Objectives

- Upgrade technology to support current teaching methods and inclusion of students who are using their personal laptop computers or mobile devices.
- Broaden instructor's ability to adjust the room environment to suit the flow of learning throughout a class period (i.e. students can work in groups/pods).
- Allow instructors and students a high degree of control over their interactions.
- Improve instructional quality and enrich student-learning experiences.
- Increase the opportunity for students to engage and collaborate with each other.
- Foster communication and collaboration skills.
- Provide accessibility to students with learning and/or physical disabilities.

Proposed Active Learning Classroom Enhancements

- Implement modern adaptable and mobile tablet seating that supports laptop computer/mobile devices, left/right hand users, varying body types, students with learning and/or physical disabilities, and adaptable positioning to create different classroom setup opportunities.
- Replace the existing technology with an updated projector, audio, and computer.
- Upgrade the SMART podium and add a document camera to the classroom technology suite.

While the requested technological equipment is the standard setup for a SMART classroom, the enhancement of FGM 214 into an active learning classroom will provide instructors the resources needed to promote student engagement and collaboration. If this grant request receives funding, it will enhance the College of Business and the University by improving student- centered learning experience. The funding of this grant would also put us one-step closer to fulfilling the University’s vision of making every classroom on campus a fully-SMART classroom.

FGM 214 is mainly utilized for business classes; however, it is also utilized for classes in different colleges. For example, as shown below, FGM 214 is being occupied by a communications class on Wednesdays and Fridays from 10:00 am – 10:50 am. This classroom has previously hosted classes in counselor education, physics, and education foundation and leadership. The schedule of classes for Spring 2024 is shown below:

Time	Monday	Wednesday	Friday	Time	Tuesday	Thursday
8:00 8:50				8:00 9:15		
9:00 9:50				9:30 10:45	ACCT 313 - 001 Khan 11/1/23 - ss/fp	
10:00 10:50		CMCN 100-014 12/7/22 mh		11:00 12:15	ECON 202-007 Slater 6/16/23 - ss	
11:00 11:50				12:30 1:45	FNAN 405-002 Das 6/15/22 ad	
12:00 12:50				2:00 3:15		
1:00 2:15	MGMT 350-002 Credo 5/12/22 mh			3:30 4:45		
2:30 3:45	MGMT 460- 001 Wolverton 10/11/23 - fp			5:00 Till		
4:00 5:15						
6:00 Till				6:00 Till		

FGM 214 has been be utilized for purposes not related to classes. In semesters past, there have been numerous events scheduled for university functions (such as orientation) and events for entities outside of the university (literary rally and summer camps, for example.) Other events requests are expected as the semester progresses.

Existing FGM 214: Antiquated seven-year-old computer, seven-year-old projector, and forty (40) antiquated desks.

Proposed FGM 214 Active Learning Classroom: New multimedia podium, computer, document camera, projector, forty (40) Stacking Multi-Purpose Chairs and twenty (20) 18 x 60 tables on casters.

Projected Lifetime of Enhancement

- Technology: Expected to have a five-year life span.
- Furniture: 15 year limited warranty.

Responsibilities

The person responsible for implementation and oversight of this project is Angel Littlejohn, MCOBA ISM Manager. Responsibilities include:

- a. Implementation
 - MCOBA ISM
- b. Installation
 - Technology: A state contractor for SMART technology installation, assisted by MCOBA ISM will install the projector, podium and its components. MCOBA ISM will install the PC.
 - Furniture: General Office Supply
- c. Maintenance

- MCOBA ISM: Provide ongoing maintenance and will immediately troubleshoot any problems that may occur.
- d. Operation
- MCOBA ISM
- e. Training (with qualifications)
- MCOBA ISM will train faculty and staff assigned to use the room.

MCOBA ISM currently maintains over 100 faculty and staff PCs, 8 classrooms in Moody Hall and 15 classrooms in FG Mouton that are enhanced with technology so the department is very familiar with the functionality of the equipment requested. MCOBA ISM has adequate staff capacity to handle the upkeep and maintenance of the equipment requested in this grant proposal.

Budget Proposal

- 1. Equipment \$42,361.63**
 - Technology - \$17,675.43
 - Furniture - \$24,686.20

- 2. Software \$0**

- 3. Supplies \$0**

- 4. Maintenance \$0**

- 5. Personnel \$0**

- 6. Other \$5250.00**

TOTAL: \$47,611.63
